

Software developer with five years of experience, specializing in React and Next.js. I place particular emphasis on code quality, testing and maintainability. I also integrate AI agents into my workflow to speed up development, refactoring and problem-solving. Proactive and full of ideas, I help continuously improve the quality and robustness of the projects I work on.

Email boissieuxmaxence25@gmail.com Location Lyon, France Work mode Remote or on-site Licence Driving licence (B) Phone +33 6 40 71 22 08 Technical skills React (Next.js) Advanced React Native Proficient Golang Proficient PHP Proficient Rust Solid foundation Languages French Native English Good command Strengths Organization Composure under pressure Patience Interests Sports (running, cycling, football, weight training) Video games	Work experience Jan. 2024 – Jul. 2026 Front-end Developer Archie Montreal, QC, Canada - Built controlled, reactive components with Next.js. - Fully reworked sections of the codebase to improve maintainability, performance and scalability. - Integrated third-party services such as Teams, Outlook and Zoom. - Developed features across both the web front-end and the mobile app. - Wrote unit tests with Jest to ensure code reliability and robustness. - Used Cursor and its AI features to speed up development, refactoring, code analysis and bug fixing. Stack: Next.js, React, React Native, Redux, Styled Components, Jest, Golang Jan. 2022 – Jan. 2024 Freelance Developer (self-employed) Maxence Boissieux Remote - Developed an educational mobile game for learning about medications, inspired by the “4 Pics 1 Word” concept. - Fixed critical bugs and completed the technical finalization of V1 of obaine.fr before its production launch. Stack: React Native, Firebase, iOS, Android Jan. 2021 – Jun. 2023 Full-stack Web Developer Evolutive Group Saint-Genis-Laval, France - Rebuilt the PrestaShop “Colissimo pickup point” module using OpenStreetMap. - Developed and maintained a PrestaShop-based Decathlon “skeleton” site for the Oneshop by Decathlon project, used in several countries. - Built a back-end server in Go to collect data from PrestaShop modules. - Set up CI/CD deployment, managed Kubernetes nodes and integrated RabbitMQ. Stack: Golang, React, Symfony, PrestaShop, Kubernetes, Docker, RabbitMQ
